

# ANTI-CLIMB FENCE / SECURITY FENCE

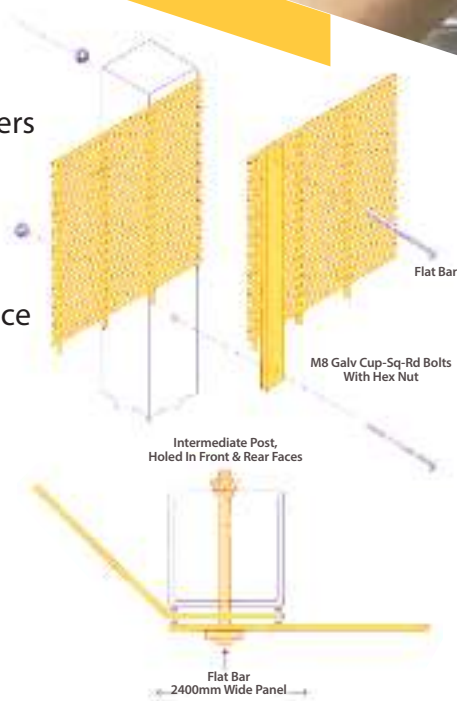

**Security fence** is a type of fence which wires are welded closely together by electrical fusion to make sure on the mesh and panel size ( Flat panel )

**Advantages:**

- @ Prevent climbing/anti-climb by trespassers
- @ High security
- @ Prevent cutting by intruders
- @ Heavy mass on a panel
- @ High tensile strength which avoid animal cross over other territory
- @ Avoid small animal slip through the fence

**Area to apply:**

- @ Airport terminal
- @ School
- @ Army Camp
- @ Prison or Jail
- @ Storage depots
- @ Foreign Workers Dormitory
- @ Electric station
- @ Zoo and Bird park
- @ Commercial or Industrial area

**Anti-climb fence (Flat panel) Specification (mm):**

Height	Length	Wire Diameter	Mesh Opening
900	2400	4	25(W) X 75(H)
1200	2400		
1500	2400		
1800	2400		
2100	2400		
2400	2400		

\*Height more than 2400mm the mesh opening will be 25mm(H) X 75mm(W)

Height	Length	Wire Diameter	Mesh Opening
900	2400	4	12.5(W) X 75(H)
1200	2400		
1500	2400		
1800	2400		
2100	2400		
2400	2400		

\*Height more than 2400mm the mesh opening will be 12.5mm(H) X 75mm(W)

## “ Your Trusted Building Materials Supplier ”

Supply all building materials with competitive prices at good quality and delivery on time.
